Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The indicated allowability of claims 30 and 38 is withdrawn in view of the reconsideration of reference(s) to Yoshihiko (JP '388). The examiner regrets any inconvenience this may cause.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 21-29, 31, 33-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent 2001-294388 (JP '388).

JP '388 discloses an elevator car having a wall 8/7 and a door 4. As seen in Figures 3-5, a sealing strip 9 is mounted in a groove formed in the surface of the wall. The sealing strip includes an upper part 9b/c that continuously seals the gap at the sides and top of the door and a lower part 9a between the bottom of the door and the threshold. The sealing strip is hollow and includes a movable wall portion that is moved when compressed air is supplied to the strip via a source 10. As seen best in Figure 4, the strip does not extend out of the groove in the relieved state.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3673

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 32 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP '388.

Changing the shape to a square is not considered inventive. See *In re Dailey*. Anderson and Pot provide evidence that square inflatable seals are known. Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to make the strip square.

Conclusion

6. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
